hair 101...  
**COLOR THEORY**

As we update our wardrobes every season, it seems only logical for our hair color to follow suit. We asked the world-renowned hair colorist Josh Wood to share his top three tips to help you find your perfect shade.

1. BE SPECIFIC

"It's essential to have a clear understanding of the color you want to achieve, so do lots of research and bring magazine tears to your consultation."

2. THINK SUBTLE

"It doesn't have to be a dramatic change. Hair that is dyed to look natural is a big runway trend this season. Just the slightest tweak to your tone will instantly update your look."

3. MATCH IT

"Skin and eye color are crucial in finding the right tone. You should also address your hairstyle when considering a change."

Josh's celebrity clients include (clockwise from top) January Jones, Karen Elson and Alexa Chung
