## SPA REVIEW | SARAH CHAPMAN SKINESIS BESPOKE FACIAL

This revolutionary facial is really worth its celebrity kudos. Sarah Chapman's own products are applied with fingertip massage techniques and removed with hot muslin cloths. They include active ingredients you won't find over the counter, such as peptides, which are great for boosting skin firming collagen,

helping lymphatic drainage and decreasing around-eye puffiness. And for the dry skin sufferer, no exfoliation with granules. Instead, lactics are massaged into the skin, removing dead cells without leaving it raw. Your face is so soft by the end, you leave stroking it.
