

# STAY YOUNGER LONGER...

**IF YOU'RE** too busy for a facial, here's a quick, easy and low-cost alternative.

Facialist Sarah Chapman, whose clients include Naomi Watts and Queen Rania of Jordan, has invented a high-tech home massage gadget.

It's claimed that her Facialift leaves skin glowing

and full of life. The odd-looking gizmo (right) has eight heads with 48 massaging nodules.

You run the heads from the centre of the face outwards, using it each day on dry skin with a cream to aid absorption.
